Tradesman 1

- Re-useable dust mask with changeable filters protecting to FMP1 or FMP2
- Produced from premium quality non-allergic, odour free, medical grade PVC
- Low resistant exhale valve for easy breathing and reduced wearer fatigue
- Lightweight and comfortable with fully adjustable elastic to allow for the perfect fit
- Highly efficient and completely reliable
- Conforms to **EN1827** and is CE marked

Tradesman 2

- Single piece construction
- Twin angle mounted design
- Use until filters expired or up to 28 days which ever occurs first, no need to keep COSHH records
- P2SL, P3S or A1P2 filters are secured to mask
- Manufactured from hypo-allergenic, odour free, medical grade PVC

- Wide elastic strapping with clip adjustment for a perfect, comfortable fit
- One exhale valve with large surface area for extremely low breathing resistance and reduced wearer fatigue
- Conforms to **EN405**

Midimask and Maximask

Midimask

- Single size fitting
- Manufactured from durable non-odour thermoplastic rubber
- Incorporates low resistance exhale valve for easy breathing
- Compatible with Olympus Uni-Fit filter range
- Conforms to **EN140**

Maximask

- Twin filter thermoplastic rubber half mask without speech diaphragm
- Offers maximum protection and comfort
- Unique, extra wide sealing surface
- Wide stable mask configuration
- Low resistance exhale valve - for easy breathing
- Low profile angle filter design for minimum visual impairment
- Filter availability via the Olympus Uni-Fit filter range
- Conforms to **EN140**
