

Electric Locking — continued

Budget Electromagnetic Locks

This range of electromagnetic locks offers cost-effective solutions for a variety of applications. As there are no moving parts, frequent lubrication or adjustment is not required, thus keeping maintenance to a minimum. These locks are ideal for small sliding doors, and brackets are available to ease installation for inward or outward opening doors.

DEEDLOCK

- Dual voltage 12/24V dc
- Monitored/unmonitored
- Maximum holding force 1166lbs
- Suitable for sliding door applications

SSW689

	Order Code	Price Each	
		1+	3+
Slimline Magnets			
Single Monitored Mortice Mount	354-1228		
Single Unmonitored Surface Mount	354-1230		
Single Monitored Surface Mount	354-1241		
Standard Magnets			
Single Monitored Surface Mount	354-1265		
Double Monitored Surface Mount	354-1277		
Single External Gate Lock	354-1289		
L Bracket for Standard Magnet	354-1290		
Z L Bracket for Standard Magnet	354-1307		
L Bracket for Slimline Magnet	354-1319		
Z L Bracket for Slimline Magnet	354-1320		

Electromagnetic Locks

These are high quality, electromagnetic locks, designed to suit a wide variety of applications which include single and double doors. A choice of brackets and plates are also available to ease any installation applications for inward and outward opening doors.

DEEDLOCK

- Available monitored or unmonitored
- Available with single and double housing for double doors
- Universal mounting configurations available
- 12 & 24V dc dual voltage
- 271kg holding force
- Anti-tamper casing
- Z bracket available for inward opening doors
- L bracket available for outward opening doors

Current consumption 12V dc 250mA 24V dc 500mA

SSW690

	Order Code	Price Each	
		1+	3+
Single Door 12V dc Only	354-1332		
Single Door 12/24V dc	354-1344		
Single Door Monitored 12/24V dc	354-1356		
Double Door 12/24V dc	354-1368		
Double Door Monitored 12/24V dc	354-1370		
Z Bracket	354-1381		
Adjustable L Bracket	354-1393		

Micro Shear Electromagnetic Lock

The Micro Shear lock is ideal for applications on double swing-doors or doors that need to retain the full doorway height and the original architectural appearance. The Micro Shear lock combines the concepts and characteristics of an electric lock and an electromagnet. With the Micro Shear magnet having such a slim profile it may be applied to a wide range of applications.

DEEDLOCK

- 12V dc
- Hall effect monitoring
- Anti-tamper case
- 796kg holding force
- Ideal for use on swing doors
- Mortice mount

Please Note: It is recommended that you power all shearlocks from a dedicated power supply unit due to the current that is drawn when locking.

Current consumption Energising (first 3 seconds): 1500mA Holding: 250mA

Water-Resistant Electromagnetic

These are high quality, water-resistant, electromagnetic locks for external applications. Available in both slimline and standard sizes, they are suitable for installation on gates and external doors.

DEEDLOCK

- Dual voltage 12 & 24V dc
- Anti-tamper casing
- Water-resistant
- 248kg holding force slimline, 452kg holding force standard

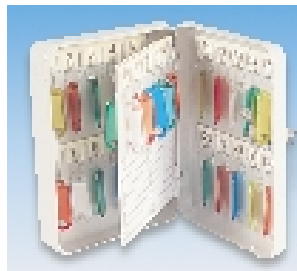

Current consumption Slimline magnet 12V dc 500 mA & 24V dc 250 mA Standard magnet 12V dc 250 mA & 24V dc 150 mA

Key Security/Accessories

30, 42, 70 or 105 Key

- Manufactured in steel
- Tough epoxy-polyester ivory paint finish
- Assorted colour key tags and rings
- Identification card included
- Adjustable bar for key height (105 key only)
- Fitted with lock and two keys are provided

Spare keys tabs are also available 20 of each colour: White, Red, Blue, Yellow, Green.

30 Key: H = 200, W = 153, D = 57 42 Key: H = 290, W = 215, D = 60
70 Key: H = 290, W = 215, D = 57 105 Key: H = 475, W = 350, D = 60

Fire Door Key Box

FD1

FD2

- Boxes for emergency key storage
- Manufactured from sheet steel with glass panel in locking door
- Two door-locking keys provided
- Boxes finished in red epoxy polyester paint
- Model FD1 box provided with hammer on steel chain to break glass
- Hammer finished in white
- Model FD2 box without hammer
