Bourns H90 109-151.					
Bourns H91 869-144					

Precision Screwdrivers

- Slot. Standard blade type
- Phillips. Original crosshead design, prone to 'cam-out'.
- Pozidriv-/Supadriv®. Pozidriv was the second generation crosshead screw. The recess has parallel sides which reduce 'cam-out'. Supadriv is a third generation crosshead design and improves over Pozidriv with better 'cam-out' and torque transfer characteristics. Pozidriv screwdrivers can be used in the Superdriv recess which is designed to accommodate them.
