Ergo - Pipe Wrench

BAHCO

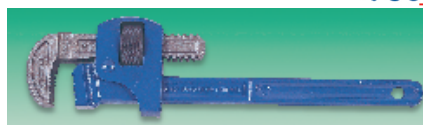

ergo

- Ergo pipe wrench engineered to give the craftsman maximum performance, in safety as well as working comfort and ease-of-use.
- Inwardly angled, aggressive teeth, fine at the inner part of the jaws, and larger at the outer part.
- The inner part of the jaws are used for maximum grip on small-dimension pipes and the outer part for maximum grip on larger diameter pipes
- Easy access to tight corners, jaws are narrow and angled
- Wider working angle gives maximum leverage. Quick adjustment of grip width with built-in guard against unthreading
