

**Pipe and Cable Locators**

**Mains/Metal/Wood Detector**

- Locates any metal object
- Flashing LED and sounder show live cables
- Detects wooden battens or joists in walls
- Adjustable sensitivity for broad sweep and accurate positioning

H = 110, W = 165, D = 30

This 'Tracker' hand-held unit contains two sensor heads, one for mains/metal and the other for wood detection. The mains/metal detector is straightforward to use, when the wood detector is scanned over a hollow plaster board wall it will indicate the position of the supporting battens or joists.

The unit is powered by a single PP3 battery (not supplied).

**Explorer Handle/Cable Detector**

- New power drill handle with depth gauge for use with power tools having a standard 43mm dia collar
- Incorporates a metal tube & cable detector
- Self calibrating
- Single button operation
- Auto switch-off function
- Detection depths
  - ½" metal tube: 50mm
  - 10mm copper tube: 30mm
  - 2.5mm cable: 50mm
- Uses a 9V (PP3) battery supplied

**Independent Metal Detectors**

C.SCOPE

- High-performance metal location
- Single control operation
- Lightweight yet rugged
- 9V battery
- 25 hours intermittent use
- In-built loudspeaker and headphone socket

A rapid and economical solution for locating buried manhole covers, pipes and other metal objects, is ideal for use on walls and ceilings.

U-Scan & Scansmitter

- Designed to be used alone in vital cable avoidance applications
- An essential part of every contractors equipment
- Standard power mode or radio mode for non-current carrying cables
- Scansmitter mode for tracing path of cables/pipes carrying Scansmitter signal
- Sensitivity control
- Audio and visual indication
- Rugged, robust yet lightweight

U-Scan is an invaluable tool for the contractor for identifying underground utilities prior to excavation.

Model	Description	Mfrs. List No.	Order Code
U-Scan cable avoidance tool	Multi mode receiver with built in 22kHz/28kHz dual frequency option	ZU3DU	720-1679
Scansmitter signal generator	Simultaneous dual frequency 22kHz/28kHz transmitter for use with U-Scan (Direct connect and induced modes)	ZS3DU	720-1680
Large carrying bag	Large carry bag for U-Scan and Scansmitter	YCB/L	720-1746
