

74ABT Advanced Bus Interface Logic

Philips Semiconductors

As well as offering the fastest speeds available, each ABT device delivers low power dissipation and low noise during simultaneous switching of all 64mA outputs. In addition the Philips QUBiC advanced BiCMOS process offers standby power of essentially zero.

74LS Low Power Schottky TTL

ON Semiconductor

Low Power Schottky offers the same speed as standard TTL but at one-fifth the power consumption.

Series Prefix: 'DM' = Fairchild, 'SN' = ON Semi
